

NASA/University Agreement Exciting, Horowitz Tells Board

Dr. Horowitz opened his President's Report to the Governors on 7 October with the enthusiastic pronouncement, "The most exciting event so far this year is the agreement arrived at with NASA."

Dr. Horowitz was referring to the procedures agreed upon to put into place the pay equity program. "We are very concerned with being fair," he went on to say, adding that "a number of jobs have been identified as being underpaid and some overpaid," but he emphasized "nobody will experience a reduction in salary."

According to Brendon O'Neill, NASA president, and the person with whom the University worked closely, the pay equity program will benefit 60 percent of the staff. It gets under way 1 April 1989 (see article, page two).

Turning to enrolment, Dr. Horowitz told the Governors that enrolment figures "change almost daily." As of Friday, 30 September, University enrolment was down by 575 students compared with the same time last year, bringing our enrolment to 29,199. Dr. Horowitz added that the University has achieved what it wanted to with the increased entrance requirements.

SU Grant Approved

The Board's Finance Committee sought and received approval of the Students' Union (SU) request for a grant of \$74,342.

SU makes a single annual grant request to the Board on behalf of its services and operations. Since 1982-83, the Board has given the grant to the SU on a global basis and has not participated in the allocation process. This year's grant

will be distributed among SORSE, Student Help and the Ombudservice, the services which the SU considers essential in the context of students' academic needs.

Car Park Construction

The Board Building Committee (BBC) recommended and received the Governors' assent for spending not more than \$7,829,915 for construction of Car Park V. Approval was given with the proviso that an operating agreement be satisfactorily negotiated with the Alberta Cancer Board and that confirmation of the transfer of funds for the project from the Minister of Hospitals and

Medical Care to the University be received.

Among other BBC items discussed was the allocation of \$161,200 to convert room 1-7 Fine Arts Building into a 24-station student/public personal computer laboratory; and a similar project for Faculté Saint-Jean, with the 24-station student/public IBM PS/2-5 personal computer laboratory costing no more than \$224,200.

An oral report was received concerning planning for the proposed LRT extension to the University. (The City plans to have the LRT operational in August 1992. The campus will have two access points, one at the southwest

corner of HUB International and the other at the north end of the Education complex.)

Educational Affairs

The Board's Educational Affairs Committee informed Governors of the receipt of the eighth annual report of the President's Advisory Committee on Campus Reviews (PACCR).

The Committee also announced the appointment of Henry Glyde as Chair of the Department of Physics effective 1 April 1989. (Dr. Glyde is currently Chair and Professor of Physics at the University of Delaware, a position he has held since 1982.) □

Laurels for Lemieux—Gold Ring, Gun Salute and Fanfare too

Raymond Lemieux, Professor Emeritus of Chemistry and internationally known for his pioneer work in carbohydrate chemistry, was awarded an honorary doctorate in philosophy

by the University of Stockholm in September.

At the Convocation ceremonies, held in Stockholm's City Hall, scene of Nobel prizegivings, Dean Cannon of the Faculty of

Mathematics and Natural Sciences crowned Dr. Lemieux with a laurel wreath and presented him with the diploma and a golden ring. Then boom! went a cannon in celebration. (The shell casing was given to Dr. Lemieux at a banquet afterwards.)

Final touch to the impressive ceremony was a glorious fanfare of trumpets as Dr. Lemieux and the two other honorary degree recipients left the stage. □

Meet the Authors of *Frozen in Time*

Frozen in Time, written by Owen Beattie (Anthropology) and journalist John Geiger, combines the history of the Franklin Expedition with the modern-day search for clues to the party's tragic fate.

The co-authors will be at the Northern Alberta Jubilee Auditorium on 25 October for a large-screen presentation of photographs pertaining to the Franklin Project. The event starts 7 p.m.

Tickets—adults, \$6; students and seniors, \$3—are available through all Edmonton BASS outlets. □

University, NASA Agree on Pay Equity Plan for Support Staff

The University of Alberta and the Non-Academic Staff Association (NASA) have reached agreement on procedures for implementing a pay equity plan for support staff. The agreement spells out a three-year plan for making equal pay for work of equal value a reality on campus.

The first pay equity adjustments will be introduced on 1 April 1989. About 25 percent of support staff will receive special pay adjustments to bring their salaries into line with the new pay equity system. There will be no pay reductions for employees earning more than their recommended pay range maximum.

The University of Alberta was a trend setter when it initiated the Support Staff Job Evaluation Study in late 1985. The study's objective was to provide the University with fair, objective and consistent job

evaluation and pay administration systems. With the assistance of management consultants, approximately 3,500 jobs were evaluated using the Aiken Plan Job Evaluation System. The Aiken Plan assigns point values in each of nine different categories to determine the level of particular jobs. The nine categories that were used to evaluate support staff jobs are:

1. Complexity Judgement - Decision-making requirements on the job.

2. Education - Level of formalized knowledge required to satisfactorily fill the position.

3. Experience - Length of time required to learn, under instruction or guidance, the essential skills and techniques.

4. Initiative - Direction and control received from either personal supervision or standard practices.

5. Results of error - Seriousness of

potential errors in judgement.

6. Contacts - Nature of contacts with people inside or outside the organization.

7. Supervision - For jobs with supervisory responsibility. Measures the character of this responsibility as well as the number of people supervised.

8. Physical Demands - Degree and severity of physical and mental exertion.

9. Working Conditions - Disagreeableness of the job

environment.

The Job Evaluation Team from Personnel Services and Staff Relations is currently meeting with Deans, Directors, Chairmen and Department Heads to review the results of the study. Once this process is completed, employee will be advised of the outcome of their job evaluations. A review process will be in place to address questions or concerns about the evaluation results. □

Research Prize Awards Renamed in Honor of Gordin Kaplan

In honor of the late J. Gordin Kaplan's dedication and untiring effort to further the research excellence of his academic colleagues as well as researchers in the public and private sectors, the University Research Prize is now called the J. Gordin Kaplan Award for Excellence in Research.

Dr. Kaplan initiated the award (two are presented each spring) eight years ago to formally recognize world-class scholars and scientists on campus whose work has brought exceptional credit to the University. Each prize consists of an engraved plaque and a cheque for \$2,500.

Northern Telecom President to Discuss Communications for the Next Century

David Vice, president of Northern Telecom Ltd., will deliver the Robert M. Hardy Lecture in Engineering on Thursday, 20 October, at 4 p.m. in L-1 Humanities Centre.

His address is titled "The Intelligent Universe: Communications for the 21st Century."

Admission is free and the public is encouraged to attend.

Mr. Vice was appointed president in 1985 (he had been president of Northern Telecom Canada Ltd. since 1983). He joined Northern Telecom in 1955 and steadily moved up the corporate ladder, one of the higher rungs being vice-president responsible for subscriber equipment, another having to do with direction, on a global basis, of the company's transmission products business. Mr. Vice also held the post of executive in charge of overall Northern Telecom operations in Western Canada.

A keen participant in the public policy process, Mr. Vice advocates the importance of education, research technology and international competitiveness.

He is first vice-chairman of the Canadian Manufacturers' Association (CMA) and served as chairman of its special task force on

business-education relations in Canada.

Mr. Vice sits on the Premier's Council of Ontario and the board of trustees for the Aspen Institute for Humanistic Studies.

The Robert M. Hardy Lecture is one of three in a series of 75th Anniversary Lectureships in Science, Agriculture and Engineering sponsored by the Alberta Research Council. The five-year lectureships series, a gift from the ARC, commemorates the University of Alberta's 75th Anniversary.

The 1988 lectures will conclude the series. □

Consultant Helps Process of Search for University President

Although it's quite usual for corporations with an executive position to fill to hire consultants to look for the right person, it's only within the last few years that universities have thought of going to a consultant for help in a presidential search.

So it was in line with this new thinking that our Presidential Search Committee engaged a consultant to help them in their search for our next president.

Janet Wright, the consultant, is a member of George Enns Partners Inc. in Toronto (she also has a doctorate in English literature from the University of Toronto where she taught for some years), and over the last eight years she has been involved in a number of presidential searches.

One of Dr. Wright's earliest assignments was the University of Toronto search that led to the appointment of President George Connell. Most recently, she helped the University of Calgary in the successful search for their new president, Murray Fraser. (Joy Calkin, Calgary's Dean of Nursing and a member of the U of C search committee, commented that Dr. Wright had "a very positive ability to pay close attention to the processes, to give very good feedback and to ask good questions. She was superb.")

Dr. Wright is quick to point out

that she is not part of the selection process. She is part of the search process, she stresses.

As a consultant, she says, her first job is to help the search committee define the issues facing the University over the next five to ten years. The next step is helping them define the qualities required in the person who will lead the institution during that time. It's a lengthy process of question and answer that takes "many, many hours and several meetings" before issues and qualities are clarified and agreed on.

When that is done, Dr. Wright's expertise in the search process comes in to play. Using her experience and network of contacts in the academic administrative community, she helps the committee get additional information on candidates they may already have identified, but would like to know more about. Her research is also geared to identifying interesting, potentially attractive candidates who may not yet have come to the committee's attention.

"I'm a facilitator of the process and I'm a bridge between most candidates and the client," Dr. Wright explains.

"There are procedures that have been proven to work effectively for me in eight years of presidential searches. There are other

procedures that have problems. Having fallen into many of those pitfalls over the preceding years, I think I know which processes work effectively and which ones have problems. And if a candidate has concerns or questions, it can be very helpful to have a consultant who can get the information for them."

There is no lack of candidates for the presidency of our University, Dr. Wright says. (Actual numbers are a closely guarded secret at present.)

"This is an important institution, and with its size and complexity and success it's a very attractive

proposition for a senior academic administrator. Your current President is admired and respected across the country—and going to the position that Myer Horowitz has held is an attraction."

Now, the process is at the point where the issues facing the University are clear, the qualities desirable in our new president are defined.

In the next stage, the committee will be preparing a short list of candidates.

And by the end of the year, the University community may learn the name of our next president. □

Photo/University of Alberta Photo Services

Review/Search Committee for Vice-President (Academic)

The President is striking a Review/Search Committee for Vice-President (Academic). The President notes that "Dr. Peter Meekison is now in his fifth year as Vice-President (Academic). It is still too soon to know whether the committee we shall need will be a Review Committee or a Search Committee, but it is important that we form one at this time."

The composition of the Review/Search Committee for Vice-President (Academic) includes three members of the full-time faculty who do not hold administrative positions and who are not on leave. Nominations for these positions are now being sought.

Written nominations supported by the signatures of five members of the full-time academic staff (not including the nominee) may be submitted to the Director of the University Secretariat, Ellen Schoeck Solomon, 2-5 University Hall. Nominations must be received by Thursday, 3 November 1988, 4:30 p.m. Nominees must agree to stand for election to the Search Committee. GFC regulations require that nominees may not be holders of administrative positions, such as Dean or Department Chair, since administrators are already represented on the Search Committee. The full composition of the Search Committee for Vice-President (Academic), together with nomination and election procedures, are contained in Section 102 of the GFC Policy Manual.

SALAD Day

Nuclear Research Centre (NRC) staff prepare SALAD (Saskatchewan Alberta Large Acceptance Detector) for delivery (for calibration) to the Tri-Universities Meson Facility (TRIUMF) in Vancouver. The detector will be there for the month of October and will then be shipped to Saskatchewan Accelerator Laboratory (SAL) in Saskatoon. SALAD was designed and built at NRC over a two-year period, three members of the principal design team being Earl Cairns, Lars Holm and Jan Soukup. U of A researchers (as well as several others from throughout North America) will make use of SALAD once it's installed at SAL. (Experiments in intermediate energy particle physics will be initiated with a beam of photons.)

Research Prize Awards

Continued from page two

One of the prizes rewards outstanding work in the general area of humanities, social sciences, law, education and fine arts (an area defined by funding support from the Canada Council and SSHRC). The other prize goes to an individual whose research contributions have been to the sciences or engineering (an area funded either by NSERC or MRC).

The three main criteria used by the selection jury are: quality of research; impact of research; and distinction which the research has

brought the University. While it is suggested that each Dean designate a committee to select a particular Faculty's nominee (each Faculty can submit one nomination, except Arts which can nominate two people), each Faculty can use whatever procedure it deems necessary. The two winners are selected by a jury drawn both from the University Research Awards Committee and the wider community.

Nominations should be directed to the Vice-President (Research), 3-5 University Hall. Deadline: 2 December 1988. □

R.L. Xu: EFF Distinguished Visitor

R.L. Xu, research professor at the Institute of Space Physics of the Chinese Academy of Sciences in Beijing, is nearing the end of his stay in the Space Physics Group as an Endowment Fund for the Future Distinguished Visitor.

Dr. Xu was born in Indonesia but eventually moved to the People's Republic of China where he graduated from Peking University in 1958. After some years in the Institute of Geophysics in the Chinese Academy of Sciences (CAS) and some significant disruption of his research activities during the Cultural Revolution, Dr. Xu joined the Institute of Space

Physics in CAS where he rose to be head of his department in 1983.

In recent years, Dr. Xu has travelled widely in the West, spending significant periods of time at the University of Arizona, University of California, San Diego, and most recently The Catholic University of America just prior to his arrival in Edmonton.

Dr. Xu has a large number of publications dealing with the physics of space plasmas with emphasis on the motion of charged particles in the Earth's magnetotail. During his stay at the University of Alberta, his research has concentrated on the nature of the

electric currents coupling the Earth's ionosphere to its outer magnetosphere. These currents are a manifestation of the same forces that come into play during the solar-terrestrial interactions which are responsible for the aurora borealis.

Dr. Xu has already given two seminars in the Department of Physics since his arrival, and will speak once more before his departure in late October.

"His enthusiasm and evolving knowledge of the environment of the Earth's magnetotail have made his visit with the Space Physics Group a productive one indeed," says Gordon Rostoker (Physics). "The planned collaborative research involving Dr. Xu's group in Beijing

R.L. Xu

and the Space Physics Group here will ensure that the benefits of his stay as an EFF Distinguished Visitor extend into the future."□

Bicycle Compound Opens in Education Car Park

A little wheeling and dealing on the part of the Bicycles on Campus Committee has resulted in the opening of a bike compound in the Education Car Park.

The facility, situated near the parking kiosk in the northwest corner of the Car Park, can accommodate up to 22 bicycles, says Allan Mah, Director of Parking Services.

A new bike rack (of the triangle variety) has been installed and there's a sturdy fence around the compound. By locking one's bike to the rack and then locking the

gate to the compound, a double measure of protection is attained. It also doesn't hurt that a parking attendant is on duty throughout the week.

Parking Services will issue a permit and assign each bike owner a space in the compound. The charge is \$5 per month or \$25 per year.

The gate is locked at all times; each owner is given a key to the compound.

The compound is available to anyone on campus.□

New Operations Manager for HUB Mall

The Vice-President (Administration) is pleased to announce the appointment of Margaret Schneider to the position of Operations Manager at the commercial mall in HUB International.

Mrs. Schneider, whose appointment takes effect on 24 October, brings to the University an impressive record of experience in mall management and promotions, having most

recently been employed as shopping centre manager of Westland Market in Spruce Grove. Prior to that appointment, Mrs. Schneider served in a similar capacity at the Abbotsfield Shoppers Mall in Edmonton for a number of years.

She is president of the Northern Alberta Shopping Centres Association.

We welcome Mrs. Schneider to the University of Alberta.□

Selection Committee for Dean: Faculty of Business

The Advisory Selection Committee is continuing its search for a Dean of the Faculty of Business. The appointment will take effect 1 July 1989 or as soon as possible thereafter. Nominations or applications for the position, accompanied in the latter case by a detailed résumé of qualifications and experience, and the names of three referees, should be submitted as soon as possible to: Dr. J. Peter Meekison, Vice-President (Academic), 3-4 University Hall, University of Alberta, Edmonton, Alberta T6G 2J9.

Smokers' Cessation Program Change

The article in *Folio* (29 September) announcing the Smokers' Cessation Assistance Program indicated that only "full-time continuing staff" can claim reimbursement of registration fees under the program.

This policy has now been revised to include all members of the

University of Alberta Non-Academic Staff Association and the Association of the Academic Staff: University of Alberta. If you are a smoker, we encourage you to obtain a complete information kit on the Cessation Program (see request form below).

Senate Rejects Proposal for Separate Course in Ethics

The Senate's annual version of "Travel Alberta" resumed on 23 September when Chancellor Tevie Miller convened a meeting not once but twice (in Spruce Grove in the morning and in Stony Plain in the afternoon).

The Senate's practice is to hold an out-of-town meeting each fall to hear what other Albertans think of the University of Alberta.

Allow us to refer to an item on the afternoon agenda first. The Hon. Peter Greschuk, a member of the Progress Review Committee on the Task Force on Ethics, moved that: "Due to the rapid and marked decline in morals and values in our society as evidenced by the unethical behaviour in the business industry, in the professions and in the field of politics, the University should teach Ethics so that graduates can be trained to recognize ethical problems and to make ethical decisions by requiring all undergraduates to take at least one separate course in ethics, preferably in their first year."

The earnestness with which the motion was presented was not overlooked by Senate, but more than a few members agreed with David Tupper when he said students would better appreciate such a course within the framework of their chosen

program. A separate, new course might not be well received, he suggested. (Two earlier recommendations from the Task Force on Ethics are that General Faculties Council consider the insertion of an "ethical component" in first-year programs and that the Board of Governors consider the development of a mission statement which encompasses a position on ethics.)

Jim Common felt that Senate should direct the motion to the Minister of Education with the suggestion that such a program be instituted for all students, that is, "from kindergarten on up", in Alberta.

There was support for the observation that higher education is placing too much emphasis on scholarship, and too little emphasis on turning out responsible citizens, however, Mr. Greschuk's motion was soundly defeated.

Cut to Morning

On the way to the meeting at Spruce Grove, Senate toured the Norman Botanic Garden and *Folio* learned that there were no formal plans for the development of the Garden. Everything came out of director Pat Seymour's head, save

for the five-acre Kurimoto Japanese Garden which, incidentally, is abuzz with activity. (The official opening is planned for June 1990 and, because a member of Japanese royalty will be present, protocol machinery is as revved up as the earth-moving machinery.)

At Spruce Grove, Alberta's 16th city (pop. 12,000) Alderman Joe Acker said that he wasn't aware of any concerns as regards Spruce Grove students (and citizens) and the University. (Recent registration figures show that 136 students attending the University of Alberta come from Spruce Grove, while 82 come from Stony Plain.) However, it was a somewhat different story at the town of Stony Plain. Earl Miller of Memorial Composite High School, speaking on behalf of teachers in the County of Parkland, said the time is overdue for the University of Alberta to discontinue its Writing Competence Test. He also criticized the University for being "too inflexible" in its program content and said faculty are handicapped (large numbers of students in many classes) in delivering the high quality instruction which we expect.

In referring to the stretching of the University's seams, Mr. Miller wondered aloud about the possibility of the University contracting out services to other institutions, for example mathematics instruction at Westerra Institute of Technology at Stony Plain.

He also said that by lowering standards slightly and using satellite centres, the University could accommodate more students. "We don't want an elitist institution or one top-heavy with graduate students," he said.

President Horowitz stated that there hasn't been a good experience anywhere in this country when it comes to establishing a branch campus. "I'm not optimistic that we will move in the direction of establishing the University of Alberta at Stony Plain."

President's Report

President Horowitz told Senate that full-time enrolment at the University is down by 697 students. Total enrolment is almost 29,000 full- and part-time students, down about 1,000 from last year's record high, Dr. Horowitz said.

The eighteen-month fund-raising program, Project Leadership, he continued, will wrap up in about three more months. "More than \$3 million has been raised so we're

well on our way to the objective of \$4 million."

He also announced that by 1 April 1989, the University will have accumulated about \$1 million to initiate its pay equity scheme.

About one-third of the support staff is being paid less than it should be. This imbalance, Dr. Horowitz continued, should be rectified under an agreement entered into by the Board of Governors and the Non-Academic Staff Association on 22 September.

Honorary Degree Recipients

Senate's honorary Degrees Committee announced that June Callwood, Tara Ali Baig and the late J. Gordin Kaplan will be awarded honorary degrees at Fall Convocation in November.

Mrs. Baig, a native of the Himalayas (she currently resides in New Delhi), has devoted much of her life to enhancing the welfare of children and women. She has led a number of national and international organizations whose mandate is the improvement of child welfare, including the International Union for Child Welfare (she was the first woman and first Asian to be elected to this Geneva-based organization) and the SOS Children's Villages of India, where she was successful in getting recognition for a new concept in institutional care of children.

As Chair of Child Welfare Planning in the Third Five-Year Plan, she headed the first economic plan in India to include provision for specific programs to improve living conditions and opportunities for children.

In striving to heighten people's understanding of women and their contributions to society, Mr. Baig helped to establish the International Women's Club, Djakarta, Indonesia, and organized "Laila Centre" for children of working women in Iran.

Among the numerous books and articles she has produced is *India's Woman Power*, a comprehensive study of the Indian woman and her values and goals. Her other writings include works on schooling, family planning, health policy and child labor. Mrs. Baig is also a radio and television commentator both in India and abroad.

She will accept her honorary LLD on 19 November.

June Callwood

Humanitarian and journalist,

June Callwood, will receive an honorary doctor of letters degree on 17 November.

Ms. Callwood, a columnist with *The Globe and Mail*, has been involved in journalism for the past 47 years. She has contributed some 300 articles to such magazines as *Maclean's* and *Chatelaine*, been a reporter for *The Globe and Mail*, authored 22 books, and been a frequent commentator for CBC television and radio.

She was a founding member of such professional organizations as the Writers' Union of Canada, Writers' Development Trust and the Periodical Writers' Association of Canada.

Never reluctant to lend more than her name to a cause, Ms. Callwood has, at various times, led the Canadian Civil Liberties Association, Justice for Children, Women for Political Action, Hospice Steering Committee for the AIDS Committee of Toronto, Canadian Organization for the Rights of Prostitutes, Feminists Against Censorship, and the National Advisory Committee on the Battered Child.

J. Gordin Kaplan

The late J. Gordin Kaplan, the University of Alberta's first Vice-President (Research), will be awarded an honorary DSc on 19 November.

A member of the Kaplan family will accept the degree.

Dr. Kaplan, who died on 6 July, was a highly respected biochemist and an outspoken champion of the need for a science policy and increased research funding in Canada. Last April, his contributions to the research and academic communities of Canada were recognized when the National Conference on University Research and the Future of Canada was held in his honor.

Dr. Kaplan joined the University in 1981 and proceeded to initiate technology transfer activities (these precipitated the creation of the Office of Research Services) and found WISEST (Women in Scholarship, Engineering, Science and Technology) the Research Policy Committee and the Central Research Fund. He was also instrumental in introducing the prestigious Research Prize Awards and was closely associated with UNDO (University Nuclear Disarmament Organization).

In 1987, Dr. Kaplan left the vice-presidency but continued to be a researcher and a lecturer. He was

Folio

Display Advertising

Folio is the official news publication of the University of Alberta, published every Thursday throughout the year (except for July and August when it appears bi-weekly). It has a regular distribution of 9,000 of which 7,800 copies are circulated to teaching and support staff, to graduate students and to other interested people on campus. The remaining copies are sent to provincial and municipal government personnel, news outlets, and businesses and people off-campus.

Sizes and rates

The basic unit size is 27 agate lines x 23 picas (3 7/8" x 2"). The full page is divided into 10 such units, any combination of which is available at a cost of \$35 per unit (minimum 1 unit). Half page cost: \$175. One column cost \$87.50. There is a 15% discount for University departments. A 10% discount is offered for five or more consecutive insertions.

Other specifications

Half-tones (100-line screen or less) are acceptable; no color or bleeds. Camera-ready copy is necessary; there is a charge of 30c per word for typesetting, and \$7.50 for adjustment of design work.

Deadlines

Deadline for submission is 3 p.m. one week in advance of desired publication date. Acceptance of advertisements and positioning are at the discretion of the Editor. For more information, telephone (403) 432-2325 and ask about *Folio* display advertising, or write to:

Romance Languages Organizes 'Marivaux 1688-1988'

If a few details of the literary and theatrical career of Pierre Carlet de Chamblain de Marivaux remain at large, they should be rounded up in the course of a three-day conference held under the auspices of the Department of Romance Languages.

Five themes will be in effect at "Marivaux 1688-1988": "Marivaux's Predecessors and Successors" (20 October); "Marivaux Outside France" and "Male/Female, Masculine/Feminine, Sexual (Textual) Identity in Marivaux" (21 October); and "A Question of Style" and "Marivaux on Stage" (22 October).

About fifty Marivaux scholars from Canada, the United States and Europe will attend the conference in the Senate Chamber, Arts Building, says Vivien Bosley (Romance Languages).

She feels that "Marivaux 1688-1988" will spark a renewal of interest in the French novelist and dramatist who died in 1763. "We'll be reassessing his influence and looking at him from a stylistic viewpoint," Professor Bosley says.

The conference will also serve to pay homage to E.J.H. Greene, former chairman of the department

who, in 1965, published one of the first books in English about Marivaux.

Following the opening of the conference (20 October, 10 a.m.) by Acting Dean of Arts Tom Powrie, Milan Dimić (Comparative Literature) will present an address of homage to Professor Greene.

Other speakers at the conference include Frédéric Deloffre of the Sorbonne; Francois Moureau, University of Dijon; Patrick Brady,

Rice University; Raymond Joly, Université Laval; Anne Ubersfeld, Paris; and Pierre Gobin, Queen's University.

The closing segment of the conference (22 October) will consist of a performance of "L'Héritier d'un village," directed by Pierre Bokor, Théâtre à la Carte, and "The Test," directed by Judy Cooke, Citadel Theatre School. Curtain time at the auditorium, Faculté Saint-Jean, is 8 p.m.□

Larose Heads L'Éducation permanente

Faculté Saint-Jean is pleased to announce the appointment of Lucien Larose as Director of L'Éducation permanente.

A native of Legal, Alberta, Mr. Larose has a wealth of experience in the fields of adult education and administration. In addition to his years of teaching, he was in charge of the training and development function at Farm Credit Corporation Canada in Ottawa from 1978 to 1981, and directed programming for arts

administrators at the Banff Centre for Continuing Education from 1981 to 1984.

Mr. Larose has been at Faculté Saint-Jean since 1984; he successively held the positions of French instructor, coordinator of the Secteur français-actif and assistant director of l'Éducation permanente.□

Students Edit IRSSS Journal

The second volume of *International Perspectives* recently hit international circulation desks and the two fo political science students who edit it hope it will become part of numerous annual collections.

Darren Matwichuk and Joan Schiebelbein, both taking a year off from studies before returning to pursue graduate work, would like to see future editions featuring submissions from students at other Canadian universities. To date, all essays have come from U of A students.

The publication provides a forum for students who, through their works, have demonstrated outstanding research, analytical and writing skills. This particular edition reflects the diverse nature of the international relations and strategic studies field. The publication takes the reader from an analysis of the Canadian White Paper on National Defence to a comparison of the two superpowers' civil defence measures, to an investigation of the political ramifications of South Korea's spectacular economic growth.

All but one of the eight contributors to the 1988 edition are undergraduate students in the Department of Political Science. *International Perspectives* is published by the International Relations and Strategic Studies Society.□

FACSIMILE

- What is it?
- Whom do I contact to find out more about it?
- Is there a Fax service on campus?
- What is the cost?

These are just a few of the questions that will be discussed by Steve White from Printing Services during the next Information Sessions for APOs.

DATE: **Wednesday, October 19, 1988**

TIME: 10:30 a.m. to 12:00 noon

PLACE: Council Chamber, University Hall

A brief product demonstration will also be presented.

While these sessions are directed at APOs, other interested staff are welcome, space permitting.

Pre-registration not required.

For more information, contact:
Mrs. Eva M. Cherniavsky
Administrative Officer (Academic)
3-13 University Hall
(ext. 4588)

Senate

continued from page 5

appointed University Professor in the spring of that year.

Chancellor Donates Land

At a banquet at Lake Eden following the Stony Plain portion of the meeting, Chancellor Miller announced that he and his wife, *Ms.*, have donated ten acres of their Seba Beach property to the University. It is expected that the Department of Art and Design will develop an artists' workshop there; other potential users include the Faculties of Physical Education and Recreation and Extension.

Seba Beach is an hour's drive west of Edmonton.

New Senators

New Senators, elected to three-year terms, are: Brock Armstrong, an Edmonton pediatrician; Phyllis Ellis, former director of the Alberta Women's Bureau; Mary Pemberton, past president of the (Edmonton) Women's Symphony Society; Walter Ross, broker; and Kayla Shochor, former Chair of the Citadel Theatre's board of governors.

Ken Balkwill, a representative of labor, has been elected to a one-year term; Chuck Knight, mayor of Fort McMurray, has been elected to a two-year term.

Newly appointed members are: *e* Deisman, Michael Hunter, Jason Lucien of the Students' Union, and Cheryl Wilson of the Graduate Students' Association

(one-year terms); Duncan Fishwick (Classics), representing General Faculties Council; and John McDonald (Science) representing Deans' Council (three-year terms).

Sheila Edwards, an appointee of the Minister of Advanced Education, will also serve on Senate for three years.

The University and the North

Senate endorsed without reservation the recommendations made by its Task Force on the University and the North.

Eighteen recommendations (number one being the development of a policy statement with regard to the University's responsibilities in the North) will be directed to various senior administrators on campus and to Advanced Education Minister Dave Russell. Chancellor Miller was heard to comment, "If they don't like our recommendations, they'd better tell us why and tell us where we went wrong."

(The Task Force pointed out that it was not within its mandate to examine the financial aspects of implementing the recommendations. In some cases, it says, funding will probably be required, while others can be acted upon through reallocation of existing funds and staff resources.)

The nineteenth recommendation is that "a progress report with regard to actions resulting from these recommendations be presented to the Senate within three years." □

Mathematics Awards First Whitney Graduate Scholarship

In memory of Eoin L. Whitney, the Department of Mathematics, with the support of his family, has set up graduate scholarships to be awarded to outstanding students in the PhD program who have a wide variety of academic interests and have passed their qualifying exams.

N. Sivakumar, the first recipient of this award, is shown with (from left) his supervisor, S.D. Riemenschneider, Mrs. Whitney,

and L.H. Erbe, Chair of Mathematics.

Contributions to the Eoin L. Whitney Scholarship Fund should be made payable to the University of Alberta (Eoin L. Whitney Graduate Scholarships) and sent to Dr. L.H. Erbe, Chairman, Department of Mathematics, University of Alberta, Edmonton, Alberta T6G 2G1. □

Sexual harassment is unwanted attention of a sexual nature, often with an underlying element of threat or coercion. Sexual harassment may occur between employer-employee, between professor-student, or between student-student.

The President's Advisory Committee on Sexual Harassment provides confidential advice about sexual harassment problems. Our office is located in 2-1 University Hall and you can reach us by phoning 432-TALK. You can drop in anytime from 8:30 to 4:30 to talk with Ellen Schoeck Solomon, Coordinator of PACSH, or to be put in touch with any of the PACSH members listed below. The Senate Annual Report 1987-88

University of Alberta
Edmonton

Chancellor's Report

Having now reached the mid-point of my term as the 13th Chancellor of the University of Alberta, I thought it might be an opportune time to pause and reflect a little, as well as outlining my main involvements over the past 12 months.

I must admit that I started off the second year with a greater feeling of confidence in that I knew much more about the University, its aims, goals, ideals, its problems and the people involved. I hope that this was the direct result of meeting in my first year with so many of the key people who make the place work in every way and my many dialogues with dozens of students attending our institution. Certainly the 1987-88 academic year has been a most difficult one from a financial point of view. While we may have had the opportunity to cut some fat from budgets in the preceding years, I am convinced that the hard decisions we had to make in this last year saw us cutting away vital muscle and nerves so that we are now in danger of harming the quality of our product. This will make the pursuit of excellence more and more elusive should the trend continue.

Having recognized the problems which do exist and which may be with us for some time, I would like to point out some of the positives we now enjoy and the promising trends I see for the future. I have the clear impression that, while things are never perfect, we are very fortunate at our University to enjoy good working relationships and mutual respect between administrators, faculty, support staff, undergraduate and graduate students. When I hear some of the stories of problems in these areas being experienced at other universities I realize that we are in an almost unique position in Canada. This obviously did not happen by itself. It is the end result of far-sighted policies and approaches which we have developed over many years, carried out by leaders representing every

part of our University community. Before I have the opportunity of giving my third annual report, Dr. Myer Horowitz will have stepped down as President of our University, and I have become convinced that much of the credit for the good relations that do exist on our campus are the direct result of the dedicated, inspired and unselfish leadership that he has provided over nine years as the operating head of the University of Alberta. His will be a hard act to follow.

Other Sources of Funding

One of the most positive trends that I have observed over the past two years is the realization of the need to develop sources of funding outside of the government support which continues to be forthcoming to cover our basic programming. While we have always tried to raise monies from private sources, it has really only been in the past few years that our University has begun to commit the resources and the time towards significant fund-raising endeavors. The Faculty of Business's "Competitive Edge" (\$6.5 million in cash and pledges), the Alumni Association's "Project Leadership" (now approaching \$3.5 million in cash and pledges), and the special campaigns for the 75th anniversaries of the Faculties of Medicine ("Preparing Physicians for the Future") and Engineering ("Bridge to the 21st Century") are campaigns that herald a new era of private sector support for the University of Alberta. Personally, I applaud all of these initiatives for I believe they will be the key to our continuing development as one of Canada's outstanding universities.

In this regard, a very special pleasure was to preside at the function to thank all those friends of the Senate who had contributed to the Senate Chamber Enhancement Fund. We are all proud of this very beautiful room, and grateful to everyone who helped restore it in such an appropriate manner.

The increasing professionalism of

our Development Office and the new emphasis placed on our Office of Public Affairs give us the groundwork and support staff necessary to tap the large residue of good will, respect and affection which we are constantly finding exists towards our institution. But this thrust cannot always be left to the professional staff. I believe it will become more and more important for each member of the University family to become a part, in some way, of this constant effort to provide the "essential extras" which will always be needed by this University if it is to realize its potential of excellence. It will not be easy to change some patterns which have been acceptable for many decades but we have made a most creditable beginning and we must build upon these strengths.

A Visit to Japan

During the summer of 1988 I had the privilege of travelling to Japan. This was made possible by a most generous invitation from the Government of Japan to visit their country and to choose my own itinerary. I asked to visit many of the universities in that country with which we have, or hope to have, reciprocal arrangements. Not only were my wife and I made welcome at the Universities of Keio, Meiji, Tsukuba and Hokkaido, but we were delighted to hear the senior officials of these famous Japanese institutions tell us of the high regard they have for the University of Alberta and their desires to increase exchanges between their institutions and ours. I am convinced that the relationships which can develop between people who work and study together are the best possible ways of ensuring peace and understanding amongst the inhabitants of the global village; and the opportunity is certainly there to expand the ties between Canada and Japan if we only make up our minds to grasp it. I was very proud to be able to tell my Japanese hosts that the University of Alberta currently offers the

second largest program of Japanese studies in Canada. We were most impressed by the dedication of the Japanese people towards education and culture and their expressed desire to make significant contributions to the welfare of the less developed parts of the world.

A very special part of our trip to Japan was the visit with the Kurimoto family in Nagoya. The personal affection exhibited by the Kurimotos towards the University of Alberta is unique and we were certainly the beneficiaries on this occasion of the warmest hospitality. A visit to the Nagoya University of Commerce (founded by Dr. Yuichi Kurimoto, the first Japanese citizen to graduate from our University) and its magnificent campus facilities is an unforgettable experience. We hope to be able to welcome Dr. Shizu Kurimoto and as many members of her family who can be present in 1990 when we anticipate the official opening of the Kurimoto Japanese Garden at the University of Alberta Devonian Botanic Garden will take place. This special garden would not be possible without the generous support of the Kurimoto family.

South Korea Takes Its Place in the Sun

Having been afforded the chance to visit that part of the world, Arliss and I took the opportunity to travel to South Korea to call upon some of the universities in Seoul with whom we have made contact. One cannot help but be amazed at the progress that small country has made in the last 35 years. Those of you who have watched any of the Summer Olympics will know that the facilities built for the occasion were simply spectacular and, if it were needed, proved to the world that South Korea has arrived as a highly industrialized, modern, competitive country. Again we heard of the high regard in which Korean educators hold the University and are pleased to learn that our University hopes soon to be able to announce the beginning of a program in Korean studies.

Other Activities

I was personally delighted that over the past year the Senate focused much of its time, talent and energy on our relationship with and responsibilities to the north. With substantial assistance from the administration we were able to hold the first ever meeting of the Senate

Yellowknife, where we were well received. It was also an education for many Senate members who were in Yellowknife for the first time. I think it says something that both the government leader of the Northwest Territories, Mr. Dennis Patterson, and the Territorial Commissioner, Mr. John Parker, are both graduates of the University of Alberta. Our Senate Task Force on the North is a very important initiative on behalf of the University and the Senate. The goal is to pinpoint and then focus on our relationship with Northern Alberta and the Northwest Territories. It's a unique relationship that, unfortunately, hasn't always been shown in the best light.

I continued to meet with new Deans, senior administrators, new executive committees and many distinguished visitors to campus in an effort to keep abreast of the many changes that are constantly occurring at our University.

Convocations are always a highlight and we may have set some records in the 1987-88 academic year. With seven regular and spring convocations plus a special one for Medicine's 75th anniversary, I believe the total number of graduates and the numbers who actually appeared to march across the stage reached record numbers. I have discovered that I am prone to suffer a new, or at least previously unnamed

malady, which I shall call "Chancellor's elbow". You get it by shaking thousands of hands in short periods of time. I expect that I will not completely recover until sometime after the end of my term of office.

I fulfilled several speaking engagements to outside groups and visits to alumni branches during the year and it was most helpful to be able to screen the excellent video produced by CFRN TV. "In Pursuit of Excellence" proves the old adage that a picture is worth a thousand words.

Once again it was physically impossible to accept all of the hundreds of invitations extended to the Chancellor to attend both on and off campus activities. My wife and I enjoyed all the ones we were able to attend and regret being absent from those we missed, for each was important to those involved and I'm sure we would have enjoyed meeting the people present on each occasion.

While it almost seems a cliché in these kinds of reports to extend thanks to staff and family, I do so again because I realize there was no way I would have been able to accomplish the things I did without the support of my wife, Arliss, and the superb staff work, consultation, advice and guidance I received constantly from the Senate staff—Mary Totman, Judy Goldsand and Doreen Kostash. They are all true professionals. To the members of the Senate, I can only say that I think our year together was marked by significant accomplishments and many good times. I can't believe its already half over but I'm looking forward to working with all of you over the balance of my term.

The University regains a harmonious meeting place.

The Chancellor participates at the opening of the Senate Chamber.

Senate Activities

In September, Senate, for the first time, held a meeting outside the Province - in Yellowknife, Northwest Territories. It was made possible through the generous support of the Vice-President (Administration) Dr. Allan Warrack; Canadian Airlines International; and the Commissioner of the Northwest Territories, Mr. John Parker (himself a member of Senate). Visitors included former Senate members Mr. Cliff Brager, Mrs. Barbara Bromley (a resident of Yellowknife) and Mrs. June Ferguson; Chairman of the Board John Schlosser; Mr. Rick Pilger (Editor, *New Trail*); Mr. Richard Price (Director, School of Native Studies); and Dr. Ross Wein (Director, Boreal Institute for Northern Studies).

Senate's off-campus meetings are designed so that people from the community can present briefs and ideas as to how the University of Alberta might better serve the area. After a welcome from the Commissioner and Mayor Mike McGrath, presentations were made to Senate by the Minister of Education, NWT; the Executive Director, Science Institute of the NWT; representatives from the Thebacha Campus and Yellowknife Program Centre, Arctic College; the President, Learning Disabilities Association of Canada; NWT Registered Nurses Association, as well as other individuals who had specific issues to raise. Almost all presentations urged closer rapport with the University, with some recognition of the special needs of the people of the Territories who are only now beginning to develop their own system of post-secondary

education. The President declared that even before receiving recommendations from the Task Force on the University and the North, he was determined the University would take seriously the expectations held by northerners. As is customary, the briefs were forwarded to those people on campus most directly involved. Reports were received from the Senate Chamber Enhancement Committee, and the newly established Task Force on the University and the North. In addition, Senate passed a motion urging the Minister of Advanced Education to respond positively to the request from the University of Alberta for special funding to cover the costs of the Early Retirement Incentive Plan.

Chairman John Schlosser thanked members of Senate for their many hours of volunteer activity for the University, and in particular for the efforts they make to bridge the gap between the University and the community.

Commissioner Parker hosted a banquet in the evening for the Senate and guests from government, education, industry and business.

In November, meeting in the Stollery Centre by kind permission of the Dean of Business, Senate received a report from the Vice-President (Academic) on developments in the area of Second Languages, as well as the Enrolment Report from the Registrar. No recommendations were made this year to General Faculties Council by the lay observers of the admissions process in quota programs. The President thanked Senate members who volunteered at the request of GFC to do this important task.

The Progress Review Committee on the Status of Women presented its draft report. This committee, chaired by Mrs. Oshry, had been working for eighteen months to review changes which had taken place since the presentation in 1975 of the Task Force Report on the Status of Women. The committee found that although important steps had been taken to alleviate some of the inequities highlighted in 1975, there was still a need for ongoing review. One of the committee's recommendations was to extend the present term of the Equity Advisor beyond the current two years, and this was adopted by Senate. The other recommendations, in accordance with Senate's new policy, were deferred for consideration to the March meeting, when further input from interested groups would also be considered.

For the March meeting Senate members travelled to the Faculté Saint-Jean, at the invitation of Dean Bour. For many it was their first visit to this special and very old part of the campus, and the Dean arranged for students to accompany Senate members on a tour of the facility. Main items of business were a report from the ad hoc committee reviewing Senate's response to the University's document "Draft Policies: The Next Decade and Beyond"; and, arising from the work of that committee, a panel presentation and discussion on the concept of a common first year of study for students - currently under discussion on campus. Participating were Tim Boston, President of the Students' Union; Professor Sharon Brintnell, Chair, Department of Occupational Therapy; Dr. Clarence Capjack, Associate Dean of Engineering; Dr.

Richard Harrison, Associate Dean of Arts; Dean John McDonald, Faculty of Science; and Dr. Orville Walz, President of Concordia College. Members of Senate had an excellent opportunity to ask questions and share ideas following the stimulating presentations.

The final Report of the Progress Review Committee on the Status of Women was presented. Of the original fifteen recommendations, the committee felt that seven had been fulfilled. Others were the subject of further recommendations by the committee, and were adopted by Senate. Copies of this report—and all Senate Task Force Reports—are available from the Senate Office.

The June meeting was held in the Council Chamber, and the main agenda item was the Writing Competence Policy. Vice-President Meekison and Dr. Lorna McCallum (Director, Testing and Remediation) brought Senate members up to date with recent changes, and included a brief résumé of the development of the policy. Ms. Elana Scraba, Associate Director, Social Studies/Language Arts Diploma Exam Development, Alberta Education, and Mr. Robin Stewart, Executive Assistant for Professional Development with the Alberta Teachers' Association, each spoke about the University's policy; commented on how it fitted in with work they were doing; and outlined some of the changes which had been made since its inception. The discussion concluded with the hope expressed by the President that, with consultation and collaboration, it would not be too long before the University would deem it unnecessary to require a Writing Competence Test.

After getting a bird's eye view of Yellowknife, Senate logged some sightseeing time on the ground.

The Task Force on the University and the North presented its draft report. Chaired by Mr. Caffaro, this group had been able to visit many different communities in northeast and northwest Alberta, as well as Yellowknife and Fort Smith. Special funding from the President's Office was gratefully acknowledged. Many individuals and groups on-campus and off, who have an interest in the North, shared their ideas with the Task Force; and through the co-operation of the Deans, a great deal of information was collected concerning activities at the University. The final report and recommendations will be presented to Senate in September. A Progress Review Report on the Task Force on Ethics will also be an agenda item in September. Senate established a new Task Force relating to the role Senate members could play in the overall public relations dimension of the University. Senate also received with regret the news of the death in April of Mrs. Betty Richardson of Calgary.

In addition to these activities, Senate received presentations by the Deans of Business and the Faculté Saint-Jean; visited the Classics Museum and the Bruce Peel Special Collections Library; and had lunch in the Central Academic Building. Senate members are grateful to the University staff who continue to respond to requests for assistance and information with such generosity. This President's regular Report provides additional information to Senate on the decisions of the Board of Governors and other matters of interest. Reports from the Alumni Association, Graduate Students' Association and the Students' Union assist them to act more effectively as advocates for the University.

Committee Activities

Community Relations

This year the committee hosted an evening function in the Heritage Lounge, Athabasca Hall, in conjunction with National Universities Week, to introduce members of the public to the work of the Senate. The committee also reviewed with Senate members the role of individuals, how that role might most effectively serve the University and how the committee could assist in fulfilling that role.

Emil Skarin

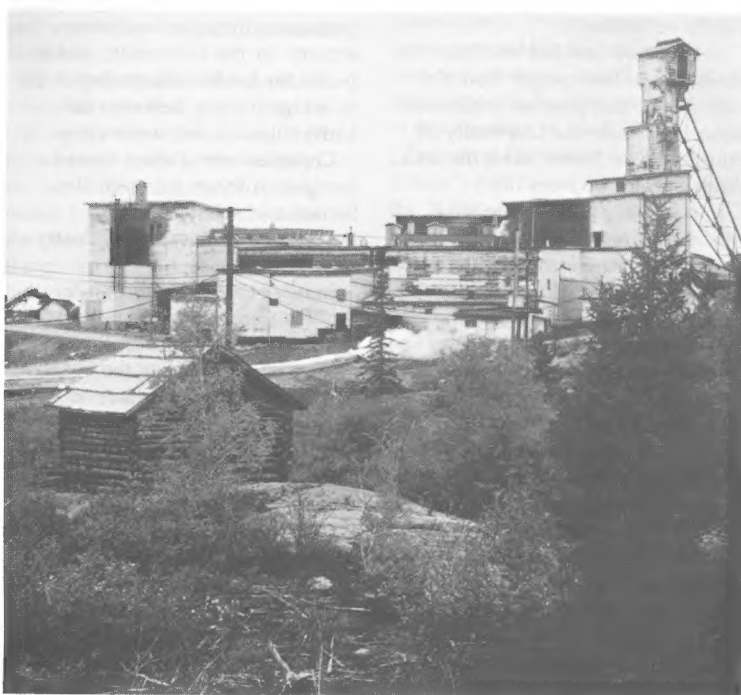

Proposals from the Medical Students' Association (to support its concert series); Friends of Rutherford House (to assist in the publication of a book for fund-raising purposes); and the University/Community Special Projects Fund (for a brochure) received financial assistance from the committee. A total of \$6,600 was disbursed.

Executive

The committee responded to several suggestions for agenda items during the past year while planning the four full-day meetings; guided the work of the task force groups; and, acting as the Finance Committee, was pleased to report a modest operating surplus at the end of the financial year.

Honorary Degrees

This committee considered most carefully the many nominations for honorary degrees which it received, adhering to the principle that only those with outstanding achievements should receive the University's highest honour.

Nominating

Working within *The Universities Act* to ensure as balanced a membership as possible among the thirty elected members, members of the committee reviewed nominations received as a result of public advertising; prepared a slate for election to Senate; conducted an orientation session for new members; and assigned Senate members to committee responsibilities.

Ad Hoc Committees

Joint Senate/Alumni Association

Established to consider Recommendation 9.1 of "The Next Decade and Beyond" (*University alumni and members of Senate should be offered more opportunities to become involved in activities and planning in the University in order to obtain their support and guidance*), this committee explored various areas in which members of Senate and the Alumni Association could assist in a volunteer capacity with programs on campus. Volunteer help was given by the Senate and the Alumni Association to the following: Advisory Council for Disabled Students; Alumni Records; Career and Placement Services; Council on Student Services; English as a Second Language Program; German speakers for conversation with students; Humanities AV Centre; Library; Physical Therapy interviews; Religious Studies Journal and the Stuttering Institute.

Senate Chamber Enhancement

The task of refurbishing the Senate Chamber was completed by December 1987, so that the room was ready for the official opening of the renovated Arts Building in March 1988.

Senate Library Endowment Fund

Senate agreed during the year to establish an Endowment Fund, the interest from which would be used to purchase special volumes for the Bruce Peel Special Collections Library, to honour each honorary degree recipient.

Convocation

This year at two days of Convocation in November, 594 of 1,565 graduates attended the convocation; and in the Spring, over a period of six days (one a Special Convocation to mark the 75th anniversary of the Faculty of Medicine), 2,409 out of 4,391

attended. Not only is there an increasing number of graduates, but currently just over 50 per cent of all students choose to attend Convocation. Receiving honorary degrees in the Fall were *T.B. Banks; the Hon. N. Crawford; A.S. Hay; and *S. Jarislowsky. In the Spring, those accepting the University's highest honour were *J. Dickson; *Huang Xinbai; *M.J. Huston; the Hon. G.V. La Forest; R.A. Macbeth; *L.E. McLeod; the Hon. W.K. Moore; *J.L. Schlosser; and I.A.M. Smith. (* denotes Convocation speaker.)

Senate Membership List 1987-88

Ex officio

Associate Chief Justice T.H. Miller (Chancellor)
Dr. M. Horowitz (President)
Dr. J.P. Meekison (Vice-President (Academic))

Task Forces

The University and the North

The aim of the Task Force is to work with people in Northern Alberta and the Northwest Territories to:

1. identify ways in which the University of Alberta serves the North, such as courses, programs, research or other special relationships;
 2. assess needs in the North which might be met by the University of Alberta;
 3. consider a role for the University of Alberta in meeting these needs;
 4. make appropriate recommendations

University of Alberta

Edmonton

The Senate

invites members of the public to nominate candidates for
Honorary Degrees

The University of Alberta awards Honorary Degrees to individuals who have made outstanding contributions during their lives.

Nominees may be of local, national or international reputation and need not be of Canadian citizenship.

Nominations must be received in the University of Alberta Senate Office by **Monday, November 14, 1988**, and should include the signatures and addresses of two nominators, as well as a resume of the nominee and at least one letter of support.

Enquiries should be addressed to:

The Senate

Campus Reviews

As part of the process of carrying out
systematic reviews under the guidance
of the President's Advisory Committee
on Campus Reviews (PACCR), the
Department of Zoology is completing
the self-study phase of the review
process. The other major phase of the
process is the site visit and assessment
by the Unit Review Committee on 7, 8,
9 and 10 November. In preparation for
this second phase, PACCR invites
written comment prior to 4 November.
Submissions are for the use of the Unit
Review Committee and will be held in
confidence by the members of that
committee.

Submissions should be sent to:
Mrs. Shirley Moore, Coordinator,
PACCR Office, W4-13 Chemistry

Building, Attention: The Zoology Unit
Review Committee.

Capital Equipment Purchases

A program has been developed to
provide the carry-over of unspent capital
equipment funds into the next budget
year. This carry-over will be limited to
the lesser of fifteen percent of the
departmental capital equipment budget
or \$50,000. Where the balance of
unexpended funds is sufficient,
commitments incurred by purchase
orders placed before 31 December will
be allocated a carry-over equivalent to
the amount of the commitment.

Where the balance of your unexpected
and/or uncommitted capital equipment
budget is presently in excess of the
foregoing limits, you are urged to place
purchase orders for your further needs now
to help ensure that delivery is effected
before 31 March 1989. The program will
not provide a carry-over in relation to
commitments by purchase orders placed
later than 31 December other than in
instances where a well-documented
justification of circumstances merits
exception. Application for exemption
should be submitted to the attention of
D. Grover, Office of the Comptroller.
Final approval on capital equipment
carry-overs remains with the Associate
Vice-President (Facilities), J.B. McQuitty.

Unexpended funds in excess of the
limiting factors will lapse into a Capital
Equipment Contingency Account.

University Women's Club of Edmonton

The University Women's Club of
Edmonton will hold its general meeting
Monday, 17 October, at 7:30 p.m. at the
Faculty Club. The topic is "Help for
Parents Abused by Their Children."

For further information on the
meeting, telephone Ruth Cavanagh,
484-8884 or 483-8219.

Faculty Women's Club Fall Luncheon

The Faculty Women's Club will hold its
fall luncheon Tuesday, 18 October, at
noon in the Faculty Club. Guest speaker
is Brian Bechtel, executive director,
Edmonton Food Bank. Tickets are \$10
plus a donation of food to the Food
Bank. All faculty women and wives of
faculty members are cordially invited to
attend. Telephone 434-7392 or 434-6365
for further information.

Talks

Geology

Volleyball

19 October, 7:30 p.m. Bears vs. York University. 21 to 23 October. Panda Classic Invitational.

Hockey

21 and 22 October, 7 p.m. Golden Bears vs. Lethbridge.

Award Opportunities

1989 Research In Huntington's Disease

The Huntington Society of Canada announces funding for a limited number of predoctoral and postdoctoral fellowships.

The purpose is to support imaginative new proposals in research directly relevant to HD.

Proposals in either preclinical or clinical sciences, or family care will be considered.

The stipend for predoctoral fellowships will be the same as the 1989 studentships. Successful applicants for postdoctoral fellowships (PhD or MD) will be paid at the prevailing rate for fellows with the MD degree offered by the MRC.

Deadline for receipt of proposals: 31 December 1988. The recipients are to be announced by 15 March 1989.

For further information, communicate with: Huntington Society of Canada, 13 Walter St. N., Suite 3, Box 333, Cambridge, Ontario N1R 5T8. Telephone (519) 622-1002.

Positions

The University of Alberta is committed to the principle of equity in employment.

In accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Academic

Manager (Operations), (Full-Time Temporary Academic Appointment), Faculty of Extension

Applications are invited for the position of Manager (Operations), Public Administration and Local Government Studies, Faculty of Extension. Reporting to the Director, this officer has management responsibilities for the sustained and efficient operation of programs and administration of this Extension programming unit. Responsibilities involve the supervision of three major program areas, and general financial, personnel and facility management for the unit.

Applicants must have minimum qualifications of a university degree (Master's of Public Administration or Public Management preferred), and possess well developed general management and interpersonal skills. The initial appointment will be made at a salary range of \$28,000 to \$35,000 per annum, commensurate with qualifications and experience. A generous benefits package is also included.

Applications, with résumé and the names of three references, should be sent to: The Director, Public Administration and Local Government Studies, Faculty of Extension, Ring House #2, University of Alberta, Edmonton, Alberta T6G 2E2. Deadline for receipt of applications is 21 October 1988 with duties commencing as soon thereafter as possible.

Support Staff

To obtain further information on the following positions, please contact Personnel Services and Staff Relations, 2-40 Assiniboia Hall, telephone 432-5201. Due to publication lead time and the fact that positions are filled on an ongoing basis, these vacancies cannot be guaranteed beyond 7 October. For a more up-to-date listing, please consult the weekly Employment Opportunities Bulletin and/or the postings in PSSR.
